SUMMARY

Python backend developer with experience in Django and Django REST Framework, focused on REST API development, relational database design (Postgres/MySQL), object-oriented programming, data structures & algorithms, debugging, and building scalable systems.

EDUCATION

Bachelor of Engineering in CSE (AIML), Saraswati College of Engineering, Kharghar — Jan '23 — Present, Kharghar

- Relevant coursework: Operating Systems; DBMS; Data Structures & Algorithms; Generative AI.

PROJECTS

Automated AI-Based Exam Management System Link
- Challenge: Build a secure online exam platform with real-time proctoring to detect cheating behaviors.
- Action: Implemented REST APIs and backend services to orchestrate exam sessions, integrated TensorFlow.js computer vision models (COCO-SSD) and audio intelligence (YAMNet) for detection, and used WebRTC for media streaming and low-latency monitoring.
- Result: Real-time proctoring via REST APIs.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, TensorFlow.js, WebRTC, REST APIs.

Unified Grievance Intelligence & Resolution Platform Link
- Challenge: Consolidate complaints from web, mobile, and social channels and provide automated prioritization and resolution suggestions.
- Action: Built backend APIs and integration layers (FastAPI/Express) to ingest multi-channel inputs, implemented ML models for spam detection, duplicate filtering, and priority prediction, and exposed endpoints to support real-time tracking and escalation workflows.
- Result: API-driven intake and priority routing.
- Tech Stack: React.js, FastAPI, Express.js, MongoDB, Python, Google Gemini API, AssemblyAI, Scikit-learn, REST APIs.

AI-Powered Personal Finance & Fraud Detection Platform Link
- Challenge: Provide real-time fraud detection and unified financial tracking across web and mobile clients.
- Action: Developed Django backend and Django REST Framework APIs, implemented fraud-detection logic with ML models, and used Django Channels to support real-time alerts to clients.
- Result: Real-time fraud alerting via Django Channels.
- Tech Stack: Django, Django REST Framework, Django Channels, Python, Machine Learning, PostgreSQL, APIs, Web & Mobile Clients.

TECHNICAL SKILLS

Libraries & ML/Visualization Python, TensorFlow, Scikit-learn, Pandas, Numpy, Open CV, Computer Vision, YOLO, Supervised & Unsupervised learning, Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Data Visualization, Matplotlib, Power BI, Tableau
Programming & fundamentals Java, Python, C programming, Object-oriented programming, DSA
API & integration REST APIs, WebSockets, WebRTC
Backend & databases Django, DRF REST Framework, API Development, Postgres SQL, mySQL, Database design, Django Channels, JWT authentication
Tools & infra git, Github, Jupyter Notebook, google workplace, vs code

ACHIEVEMENTS

Finalist and Presenter: Aavishkar Research Convention (20th Edition)
University of Mumbai — Finalist & Presenter
Finalist and Presenter: Aavishkar Research Convention (20th Edition) University of Mumbai — Finalist & Presenter
Finalist: Code-a-Thon (Top 14 of 100 teams)
Vidyalankar Institute of Technology — Finalist (Top 14/100)
Finalist: Code-a-Thon (Top 14 of 100 teams) Vidyalankar Institute of Technology — Finalist (Top 14/100)
Finalist: Nirman Hackathon (Top 10 of 85 teams)
Amity University Mumbai — Finalist (Top 10/85)
Finalist: Nirman Hackathon (Top 10 of 85 teams) Amity University Mumbai — Finalist (Top 10/85)

EXPERIENCE

- Gathered stakeholder requirements and delivered end-to-end Python/Django backend services, implementing Django REST Framework API endpoints for reliable data ingestion and processing to support downstream reporting workflows.
- Designed relational database schemas and implemented SQL queries and data migrations on PostgreSQL/MySQL; applied performance tuning to improve throughput and query efficiency.
- Ensured data quality and reliability via unit and integration tests, logging/monitoring, and debugging of pipelines; collaborated with product managers on deployments and acceptance criteria.

CERTIFICATIONS

Deloitte Australia Data Analytics Job Simulation on Forage, Deloitte — Jul '26

EVENT LEADERSHIP & ORGANIZATION

- Event Head, Code Royale — organized an 8-hour college tech fest for 120+ teams and led the selection of the top 30 finalists.
